***DETAILED ACTION***

1. This Office Action is the answer to the pre-Appeal Conf. request, which papers have been placed of record in the file.
2. Claims 1-40 are pending in this application. Claim 41 is canceled.

***Response***

3. The current examiner respectfully submits that a new ground of rejection is applied to pending claims 23-28, and 35-40. The arguments for previous rejections are moot.

***Drawings***

4. The submitted drawings are acceptable for examining purposes.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 15, and 35 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicants regard as the invention.

Above claims are directed to a computer system for generating an aircraft routing proposal, comprising:

- means for determining an aircraft/flight routing proposal for the aircraft that satisfies the received information (see claims 15, and 35); and
- means for optimizing the proposed flight assignment ... (see claim 15).

- The examiner fails to see a clear support for these means-plus-functions; usually the computer instructions would perform those functions; however, it is unclear to one with skill in the art to implement what are claimed by applicants without pointed out what specifically represent those functions.
6. Dependent claims 16-28, and 36-40 are rejected because they incorporated those deficiencies.

### *Conclusions*

7. Claims 1-14, and 29-34 are patentable.  
Claims 23-28, and 35-40 are not patentable
